

10

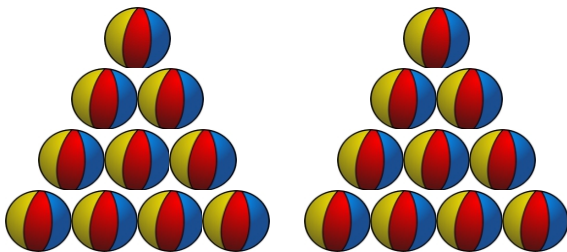

When we use 1 and 0 to write the number 10, we need two places. We write '0' in the ones place and '1' in a new place before it called the tens place.

Remember this?

Tens ones
= 1 ten = 1 0 = 10

Tens ones
= 2 tens = 2 0 = 20

Here we have 2 tens. So we write 2 in the tens place.
